To Decorate Sparkle Eyes Barbie® Cake

You will need tips 3, 16, 103; Wilton Icing Colors in Pink and Black; one package Bomboniere™, Pink Tulle Circles (optional), Edible Glitter (optional). We suggest you color all icings at once while the cake cools. Refrigerate icings in covered containers until ready to use.

Make 4 ¼ cups buttercream icing:

- Tint 2 cups pink (thin 1 ½ cups with 1 Tablespoon plus 2 teaspoons light corn syrup)
- Tint ¼ cup gray
- Reserve 2 cups white

Baking Instructions

Preheat oven to 350°F or temperature per recipe directions. Your cake will unmold easily, without sticking, when you prepare the pan properly. Grease the inside of pan using a pastry brush and solid vegetable shortening (do not use butter, margarine or liquid vegetable oil). Spread the shortening so that all indentations are covered. Sprinkle about 2 Tablespoons flour inside pan and shake so that flour covers all greased surfaces. Turn pan upside down and tap lightly to remove excess flour. If any shiny spots remain, touch up with more shortening and flour to prevent cake from sticking. (You can use vegetable oil pan spray or vegetable oil pan spray with flour, in place of solid shortening and flour, or use **Wilton Cake Release**, for perfect, crumb-free cakes or **Bake Easy Non-Stick Spray** for easy release).

Make one 2-layer cake mix according to package or recipe directions. Pour the cake batter into pan, and if necessary, spread the batter around with a spatula to fill all areas of the pan evenly. Be careful not to touch sides or bottom of pan. Bake cake on middle rack of 350°F oven for 30-40 minutes or until cake tests done according to recipe directions.

Remove cake from oven and cool on cake rack for 10 minutes. While the cake is still in the pan, carefully slice off the raised center portion of the cake. This allows the cake to sit more level and helps prevent cracking. To remove cake from pan, place cooling rack against cake and turn both cake rack and pan over. Lift pan off carefully. Cool cake at least one hour. Brush loose crumbs off cake.

To transfer cake to serving board, hold a cake board against cake and turn both cake and rack over. Lift off rack. Hold another board against bottom of cake and turn cake over. Be sure to hold cake, rack and board close together while turning to prevent cake from cracking.

Using Your Decorating Bag and Coupler

You can make many different designs with just one decorating bagful of icing by using the Wilton Featherweight or Disposable Decorating bags and coupler and changing decorating tips.

Just follow these steps:

1. Screw ring off coupler to expose series of tiny threads ½ in. above coupler base.
2. Force coupler base as far down into decorating bag as it will go. Then mark where bottom thread of coupler shows through bag; remove coupler and trim bag at pencil mark with a pair of scissors.
3. Reposition coupler in bag and push end through opening to expose bottom two threads.
4. Position decorating tip over coupler and screw ring in place to secure. To change tips, unscrew ring, replace tip and replace ring.
5. To fill, cuff open end of bag over your hand and insert icing with a spatula. Fill bag no more than half full.
6. To close, unfold cuff and twist top of bag shut. Hold twist between your thumb and forefinger. Note: You can eliminate any air bubbles that may have formed by squeezing bag gently over icing bowl until air is released. Important: Be sure to wash the Featherweight bag in hot soapy water, then rinse and dry after every use. A degreaser can make clean-up easier.

Using Parchment Bags

Parchment bags made from parchment paper triangles give you more versatility and the convenience of one-time use. Follow package directions. To "pipe-in" using a cut parchment bag, cut the point of the bag to desired opening.

Coloring Your Icing

Wilton Icing Colors are best for decorating because they are concentrated and give the deepest, most vivid icing colors. Use a toothpick to swirl icing color into icing, then mix well. Add color gradually until you get the icing color you desire.

Decorating With Wilton Icings

Wilton Frosting Mix: You will need 2-3 packages of Creamy White Icing Mix. To prepare, follow package directions. Each package makes about 2 cups icing. Excellent for tinting any shade required. If you're using another type of icing mix, you will need three 15.4 oz. packages of the creamy vanilla type that will ice two 8 in. or 9 in. layers. For each package of icing mix, use four less teaspoons water than package directs. Each package makes about 1 ¾ cups icing. Do not refrigerate icing before decorating. Cake may be refrigerated after it is iced.

Wilton Ready-to-Use Decorator Icing: You will need approximately 2-3 cans of our delicious white icing. Each 16.5 oz. can holds about 2 cups. It's ideal for all of your decorating needs – icing, decorating and flower making.

Making Buttercream Icing

The thick, but creamy texture of this flavorful icing makes it ideal for decorating*. For best results, keep icing bowl in refrigerator when not in use. It can be refrigerated in an airtight container for up to 2 weeks. Rewhip before using. YIELD: 3 CUPS.

½ cup solid vegetable shortening	2 Tablespoons milk
½ cup butter or margarine	1 teaspoon Wilton Clear Vanilla Extract
4 cups (1 lb.) sifted confectioner's sugar	

Cream butter and shortening with electric mixer. Add vanilla. Gradually add sugar, one cup at a time, beating well on medium speed. Scrape sides and bottom of bowl often. When all sugar has been mixed in, icing will appear dry. Add milk and beat at medium speed until light and fluffy.

*To thin for icing cake, add a small amount of light corn syrup.

Icing Smooth With A Spatula

With a spatula, place icing on cake. Spread icing over area to be covered. For a smooth effect, run spatula lightly over the icing in the same direction, blending it in for an even look. For a fluffy effect, swirl icing into peaks using the edge of the spatula.

Let's Practice Decorating

Use decorating bag and coupler as directed. Practice each of the following techniques on the back of a cookie sheet with white icing. The practice decorations can be scraped off the cookie sheet back into the mixing bowl and rewhipped for use again. To hold bag while decorating, curl fingers around bag with the end twist locked between your thumb and index finger. This forces the icing down into the tip each time you squeeze.

Apply an even pressure with all four fingers and icing will come out of the tip until you stop squeezing. As you decorate, periodically twist the bag down further, forcing the icing down into the tip. Use fingers of other hand to guide as you decorate.

For more about decorating, refer to the Wilton Yearbook of Cake Decorating.

To Make Outlines

Use tip 3. Hold bag at a 45° angle and touch tip to surface. Squeeze at starting point so that icing sticks to surface. Now raise the tip slightly and continue to squeeze. The icing will flow out of the tip while you direct it along surface. To end an outline, touch tip back to surface, stop squeezing and pull away. If icing ripples, you are squeezing bag too hard. If icing outline breaks, you are moving bag too quickly or icing is too thick.

To Outline and Pipe In

After outlining, using the same tip, squeeze out rows of lines to fill area. Pat icing down with fingertip dipped in cornstarch or smooth with dampened art brush.

To Make Stars

Use tip 16. Hold bag straight up and down (see illustration) with tip 1/8 in. above surface. Squeeze until a star is formed, then stop pressure and pull tip away. Your stars will be neatly formed only if you stop squeezing before you pull the tip away.

To Make Beads

Use tip 3. Hold bag at 90° angle to surface, with end of bag pointing towards you. Lightly touch tip to surface and squeeze until icing builds up and fans out to a base. Then lift tip slightly and relax pressure as you pull tip down and towards you to make a tail. Stop pressure completely and pull tip away for a finished bead. Practice this procedure until you can produce a clean bead shape. To make a row of beads, rest head of one on tail of preceding bead. For larger beads, increase pressure, for smaller beads, decrease pressure.

To Make Dots

Use tip 3. Hold decorating bag straight up and down with tip 1/8 in. above cake. Squeeze to form a dot. Keep tip in icing until dot is the desired size. Stop pressure and pull tip away.

To Make Leaves

Use tip 352. Hold bag at a 45° angle with tip lightly touching surface. Squeeze and hold tip in place momentarily to let icing fan out. Then relax and stop pressure as you pull tip away and draw leaf to a point.

Note: Right-handed decorators work from left to right; left-handers decorate right to left, except when printing or writing.

To Make Ruffles

Use tip 102 or 125. Hold bag at a 45° angle to surface, finger tips on bag facing you. Touch wide end of tip to surface, finger tips on bag facing you. Touch wide end of tip surface, angle narrow end out about 1/4 in. away from surface. As you squeeze, move hand up and down slightly to ruffle the icing.

To Make Rosettes

Use tip 16. Hold decorating bag straight up with tip 1/8 in. above surface. Squeeze and hold tip in place momentarily, then move tip around to the right using a short circular motion. Stop pressure just before reaching original starting point and pull tip away.

To Make Cornelli Lace

Use tip 3. Hold bag at a 90° angle; position tip slightly above surface. Use thinned icing to pipe a continuous string of icing. Curve it up, down and around until area is covered. Stop pressure, pull tip away. Make sure strings never touch or cross.

To Make Scallops

Use tip 103. Hold bag at a 45° angle to surface, fingertips on bag facing you. Touch wide end of tip to surface, angle narrow end out about inch away from surface. As you squeeze, swing tip down and up to the right forming a scallop.
